

About Paragon Software Group

Paragon Software Group is the leading developer of multi-platform software applications for smartphones and desktop computers. Paragon's diverse range of products includes:

- cost-effective solutions for hard drive management, storage management and data protection (System Utilities Department),
- multi-platform software for mobile devices (Smart Handheld Devices Division and Epocware),
- Oracle databases (Intelware Department).

Paragon Software Group is an international holding company with branch offices in Germany, Russia and the USA, and employs more than 200 IT professionals around the globe. Since its inception in 1994, the company has strived to exceed the expectations of its global customers by translating its innovative approach, expertise and independent production capacities to all levels of its diversified product development.

Smart Handheld Devices Division and Epocware

Paragon Software's Smart Handheld Devices Division (SHDD) and Epocware branches specialize in the development of end-user and custom software for PDAs, Tablet PCs, communicators, smartphones, mobile phones and desktop computers.

The applications support mobile devices (Android, BlackBerry, iPhone, iPod touch, Java, Windows Mobile, Symbian OS, Palm OS), and desktop PCs (MS Windows and Mac OS platforms).

The company's most recent areas of development include:

- **120 Multilingual Dictionaries (for 30+ languages and all possible language pair combinations)**

SlovoEd and its extensive family of monolingual and bilingual dictionaries for handheld devices, bundled with the world's foremost line of language-related reference works such as Merriam-Webster, Oxford, Duden, PONS, Van Dale, VOX offer the capability to translate to the most widely used languages of the world, all in the handheld environment.

- **Localization Systems**

LEng and PiLoc full-scale localization solutions create a genuine language environment to better customize mobile devices for the local markets.

- **Handwriting Recognition**

PenReader & PenReader Touch provide multilingual handwriting recognition software and unique custom solutions for corporate customers to support efficient text input for devices.

- **Personal Productivity Tools and Services**

Handy personal productivity and lifestyle utilities, as well as game applications, enhance device performance.

Paragon Software has built strong partnerships with the leading technology players, such as Acer, ASUS, BenQ, DELL, E-TEN, Fujitsu-Siemens, Hewlett-Packard, HTC, IBM, LG, Microsoft, Mitac, Motorola, NEC, Nokia, Orange, Palm, PalmSource, Rover Computers, Samsung, Siemens, Sony, Sony Ericsson, Swisscom, T-Mobile, Toshiba, Wacom, among others.

Paragon Software's technologies are acknowledged worldwide by both customers and leading IT companies. The company was awarded Microsoft Gold Certified Partner status with ISV (Independent Software Vendor) and Mobile Solution competencies, an honorable addition to its Microsoft Tablet PC Premier Partner status.

Epocware was distinguished with Forum Nokia PRO Member status and participated in Symbian Platinum Partnership and UIQ Alliance. Additionally, it became The Best Software Developer for Symbian OS Platform in 2002, Forum Nokia PRO Award Winner 2004 and The Best Software Developer for Symbian UIQ Platform in 2005 in Handango Champion Awards.
